SUMMARY

Motivated Year 3 IT undergraduate at SLIIT with hands-on experience building full-stack web and Android mobile applications. Proficient in the MERN stack, Spring Boot REST APIs, and Kotlin; skilled at developing responsive UIs and real-world software solutions in collaborative team environments. Passionate about emerging technologies and solving real-world problems. Currently seeking an internship to deepen technical expertise and contribute to innovative product development.

PROJECTS

Back2U – Smart Lost & Found Management System | MERN Stack 2026
github.com/chamodhly/IT3040-ITPM-Back2U-WD_21_1.2

- Developed a university campus lost-and-found platform with advanced item search and filtering capabilities.
- Implemented the Lost Item Search feature using advanced filtering and query functionality.
- Developed the Intelligent Item Match Suggestion System to improve item recovery efficiency.
- Contributed to secure and user-friendly workflows for reporting and managing lost and found items.

Smart Campus Operations Hub | Spring Boot | React.js | REST APIs 2026
github.com/chamodhly/it3030-paf-2026-smart-campus-group-Y3S1-WD-17

- Developed a maintenance incident management system with full ticket lifecycle tracking.
- Implemented timestamp-based workflow tracking for maintenance incidents.
- Developed KPI metrics including Time to First Response, Time to Resolve, and Time to Close.
- Improved operational efficiency through automated workflow monitoring and accountability tracking.

Cinnex – Cinnamon Plantation Management System | MERN Stack 2025
github.com/uduladapsara/ITP---cinnex

- Developed a plantation management system supporting issue reporting, inventory management, and operational workflows.
- Implemented the Issues & Response Management Module covering issue reporting, tracking, and resolution workflows.
- Developed CRUD functionalities for plantation health issues, inventory shortages, consultant recommendations, and issue resolution.
- Integrated automated notifications and inventory workflows to improve communication across management roles.

HabitTracker – Android Wellness App | Kotlin | SQLite | Android Studio 2025
github.com/diykumarasinghe/HabitTracker

- Independently developed an Android application for tracking wellness activities, mood, sleep patterns, and healthy habits.
- Implemented local data persistence using SQLite and designed intuitive mobile user interfaces.
- Enhanced user experience through organized wellness monitoring and activity management features.

EDUCATION

BSc (Hons) in Information Technology – SLIIT Sep 2023 – Present
Specialization: Information Technology | Currently: Year 3, Semester 2

Diploma in Information Technology – ESOF Metro Campus Jan – Jun 2020

Diploma in English – ESOF Metro Campus Jan – Jun 2020

CERTIFICATIONS

MongoDB Atlas Administrator Path – MongoDB 2026

KEY SKILLS

Languages: Java | JavaScript | Kotlin | C | C++ | HTML | CSS

Frameworks: React.js | Node.js | Express.js | Spring Boot

Databases: MongoDB | MySQL | SQLite

Tools: Git | GitHub | VS Code | Android Studio | Postman | MongoDB Atlas

Technologies: MERN Stack | REST APIs | JWT Authentication | Responsive Web Design

LANGUAGES

Sinhala (Native) | English (Intermediate)
